NUM

This is another matrix style report showing stock on hand in various warehouses. This report was created in exactly the same way as the previous printed matrix report, although this time the report output was formatted for Microsoft Excel (and includes the headings).

Processing 100,000s of records? Rekeying data from reports? Let the iSeries-400 take the strain. Produce disk output in the format for your favorite PC application applying whatever selection, sorting or calculations you require before downloading the resulting file to the PC. So simple.
